### About me

My name is **Seyha Soeurn**, 19 years old. I'm from a small family in the countryside, Battambang Province. I am the second child in my family, I have a sister and a brother. My family was broken many years ago and my grandparents have brought me to an organization since I was young. I grew up with a simple life and sometimes it is hard to accept. I have never had time together with my family because my parents, they all have already had new families.

Nowadays, I live in Phnom Penh City which is the capital of Cambodia. I'm a student at Passerelles Numeriques Cambodia (PNC). I'm studying Information Technology (IT), for I want to be a WEB Developer. I've been interested in Information Technology since I was studying in grade 11. I'm a lucky person because I can study at PNC. For my life in the city, I have lived with my organization that supports my studying since I was young. My feeling was surprising the first time I arrived in Phnom Penh, but it doesn't mean I like the city, I dislike the city because I like living in the countryside.
